Ilda Rusi (Polis University) - Albania

Maria Caprile (Notus) - Spain

**12:25 Conclusions**

Carlo Trestini - Cristina Raghitta (CNCE)

**12:30 End of the meeting**

The YES project investigates posting of workers in the construction sector from a 'skills' perspective. Broadly intended, this 'skills' perspective encompasses: information needs of posted workers, aspects concerning qualifications and recognition of qualifications, and the possibility to use posting and mobility to improve competences of workers.

More information on the project's activities and results are available at the web-site: [www.yesproject.net](http://www.yesproject.net)

The final conference shall present key findings and policy recommendations, also via a debate covering the practical experiences analysed throughout the project across: Albania, Germany, Italy, Poland, Portugal, and Spain.

The project is realized with financial contribution of the European Commission, under the call for proposals VP/2019/008.

The European Commission is not responsible for the project's contents nor for the use that can be made of the information it delivers.
